|---|---|---|
| **Education** | **Moscow State University of International Relations (Russia)** | **2014 – 2018** |
| | International Relations and Political Science. | |

**Freie Universität Berlin (Germany)**     **2016 – 2017**
International Relations and Political Science.

**Online courses on computer science and web programming (Python, JavaScript, React, Django, Express) and other technologies by Harvard Education, Google and freeCodeCamp**

**Projects**
- https://cups.online/en/,
- https://aiijc.com/en/,
- https://education.vk.company/,
- https://authors.vk.company/,
- https://internship.vk.company/,
- Systems and portals for internal use.

**Achievements**
- Developed an online tech support chat system (Django, Centrifugo websocket, TypeScript, React) from scratch to enhance UX,
- Coded admin sites for managers (Django, React, Express, TypeScript) from scratch,
- Optimized heavy DB queries to speed up requests and fixed leaking URLs,
- Equipped projects with unit tests, reaching 50% test coverage (Python, Jest),
- Automated composing and submitting financial reports in Excel (Python, Bash),
- Gave open lessons and participated as a speaker in conferences on JavaScript and building APIs.

**Experience**

**VKontakte (VK)**     **2023 – present**

Middle Full-stack Developer:
     - Developing and maintaining business projects (Django, React, Next),
     - Fixing bugs and implementing new features,
     - Refactoring and updating codebase (e.g from class components to functional components),
     - Writing tests to cover newly developed features and the most crucial functions,
     - Giving code reviews colleagues.

**Weborama Russia**     **2022 – 2023**

Junior Web Developer:
     - Developing and maintaining projects for internal use only (Flask, FastAPI),
     - Fixing bugs and implementing new features,
     - Writing scripts to process data (Bash),
     - Building APIs (Python),
     - Refactoring UIs (JavaScript).

**GUTA Group**     **2019 – 2022**

Business Analyst & Software Engineer:
     - Building software to automate business processes (financial reporting, expense approval),
     - Developing user-friendly UIs for internal systems (JavaScript, Express, Node),
     - Automating Excel reports (Python),
     - Building landing pages for subsidiary companies to comply with local laws (HTML, CSS, JS),
     - Developing Telegram notification bots (Python).
